CSCI 5308: Budget Surfing

Group: 18

Client Team: 24

Team Members:

Neelansh Gulati

Tuan Hamid

Parth Gondaliya

Hardee Garala

GRM Vishnu

What application is trying to achieve?

- Platform to organize and manage travel plans
- User creation(host/traveler) via email confirmation
- Trip creation by traveler
- Keep track of expenses incurred during trip
- Provide email-notifications if exceeding budget limit
- Host can select traveler to stay at their property and provide feedback/rating
- Traveler can make pre-payment (token-money) to the host

Project dashboard stats

Total Number of Tasks: 135

Task Completed By Individual

Neelansh Gulati: 26

Tuan Hamid: 22

Parth Gondaliya: 34

Hardee Garala: 26

GRM Vishnu: 27

Quality ranking increasing over a period of time

Time for Demo

Project status w.r.t. final goals

Goals	Status
User Registration, Account verification through OTP sent on registered email, Login Module.	Achieved
Profile creation of users.	Achieved
Budget and Category planner module.	Achieved
Timely notifications if exceeding budget limits.	Achieved
Trip Creation of request by traveler.	Achieved
Acceptance of request by host from the list of all pending requests.	Achieved
Feedback or Rating about traveler.	Achieved
Expense tracker.	Achieved
Payment module using Stripe (Extra feature)	Achieved
Host building (Extra feature)	Achieved
Email notification module (Extra feature)	Achieved

Learning from the project

- Difficult to accommodate last minute changes.

- How to code keeping code quality, SOLID principles, and testing in mind.

- How to work as a team professionally following Agile methodology and adapting to challenges.

- Handle meetings and project work side-by-side.

- Entire project workflow from project setup to deployment.

- Handling client expectations and demands.

Steps to follow if given a chance to repeat

- Backend pagination.

- Chatbot feature.

- 2-way acceptance for host and traveler.

- Stick to functionality decided before and not have last minute changes.

- Ensure sufficient time for testing (more the better).

- Everyone in team should have complete knowledge of modules of peers.

- Stick to SOLID principles and coding standards to avoid rework.

- Have complete clarity with client team before starting to work on any module.
